

**AF AMERICAN
FRICTION Inc.**

AF AMERICAN
FRICITION Inc.

American Friction stocks popular clutches including Airflex “CB” and “VC”, National Oilwell “DyaFlex” type clutches, Twin Disc “PO” type clutches and others. We also have for immediate shipment most of the clutch parts you may need. Send us your old clutch and we will rebuild it to “as new” specs. Please ask us about “core credits” we offer when you place an order for a new or rebuilt clutch.

PRODUCT LINE SHEET

BRAKE BLOCKS (Woven and Molded for All Oilfield Drilling and Well Servicing Rigs)

BRAKE RIMS (Weld-Overlay Rockwell C Scale 50 - 52, Carbon or Stainless Steel Water Jackets)

BRAKE BANDS (New or Reworked - Magnfluxed, Re-Formed and Certified)

BEARINGS (OEM Certified: for Mud Pump, Drawworks and other Oilfield Applications)

V-BELT POWERBANDS

OVER RUNNING CLUTCHES

GEAR TOOTH CLUTCH FACINGS (for Twin Disc and Wichita Clutches)

COMPLETE PRODUCT LINE OF OEM AND OEM REPLACEMENT CLUTCHES AND BRAKES FOR THE FOLLOWING MANUFACTURERS:

EATON®, **AIRFLEX®**, **FAWICK®** **CLUTCHES** and **BRAKES**

COMPLETE LINE OF "CB", "VC", "EB", AND "E" MODEL CLUTCH ELEMENTS and REPLACEMENT PARTS (Tubes, FSA Kits), ROTARY SEALS, QRV'S.

WICHITA®, and **WPT®** type **CLUTCHES** and **BRAKES**

POWER GRIP, LOW INERTIA, SPRING-SET, COPPER COOL, STEEL WATER COOL, HIGH TORQUE, and POWER TAKE OFFS. COMPLETE CLUTCHES AND REPLACEMENT PARTS SIZES 4" THROUGH 60".

TWIN DISC® **PTO TYPE CLUTCHES**

COMPLETE CLUTCHES AND REPLACEMENT PARTS

NATIONAL OILWELL®

COMPLETE CLUTCHES AND REPLACEMENT PARTS

DYAFLEX TYPE CLUTCHES®

COMPLETE CLUTCHES AND REPLACEMENT PARTS

Please call for additional information.

WOVEN BRAKE BLOCKS

American Friction Woven Oilfield Brake Blocks are produced using the highest quality heavy duty blended yarns available. These yarns are made with high tensile strength long selected organic and inorganic fibers twisted with brass wire for added strength and improved thermal conductivity. The woven tape is impregnated with high temperature resistant resins and friction modifiers which bonds the material (prevents unraveling), stabilizes the coefficient of friction, and improves wear life. The lining is then tightly compressed into a dense accurate form by calendering, then semi cured. Afterward they are calendered again and final cured. The finished block is sanded to the proper tolerance and radiused. The result of this time consuming process is a very dense, durable and consistently performing brake block.

ADVANTAGES

- 1) Extreme Heat Resistance
- 2) Coefficient of Friction Remains High at Extreme Temperatures
- 3) Excellent Cool Down (Heat Dissipation)
- 4) Dual Stage Curing (for extra long life and accurate fit)
- 5) High Tensile Strength
- 6) Low Wear Rate
- 7) Non Abrasive to Brake Rims

MOLDED BRAKE BLOCKS

American Friction Molded Oilfield Brake Blocks are produced using special blends of ingredients including thermosetting resins, reinforcing fibers and friction modifiers. Some of the fibers used to make these blocks include kevlar, acrylic, carbon and glass. The finished block is ground on both sides and grooved cross sectionally to improve flexibility and reduce stress to the radii. A stainless steel wire mesh is molded into the back of the block in order to eliminate the possibility of cracked or broken segments falling away from the brake band. The resultant block has excellent resistance to thermal shock and high tensile and compressive strength.

ADVANTAGES

- 1) Extreme Heat Resistance
- 2) Coefficient of Friction Remains High at Extreme Temperatures
- 3) Excellent Cool Down (Heat Dissipation)
- 4) Excellent Physical Strength
- 5) Coefficient of Friction Equal to Woven
- 6) Improved Wear Rate Equal to Woven
- 7) Non Abrasive to Brake Rims

GEAR TOOTH CLUTCH FACINGS

• (and Other Special Molded Pieces)

American Friction Molded Gear Tooth Clutch Facings are produced using special blends of ingredients including thermosetting resins, reinforcing fibers and friction modifiers. Some of the fibers used to make these facings include kevlar, acrylic, carbon and glass. The finished facing is ground on both sides to OEM specifications or customers specific requirements. The resultant facing has excellent resistance to thermal shock, with high tensile and compressive strength.

ADVANTAGES

- 1) Extreme Heat Resistance
- 2) Coefficient of Friction Remains High at Extreme Temperatures
- 3) Resistant to Shear Loadings
- 4) Excellent Physical Strength
- 5) Coefficient of Friction Equal to OEM
- 6) Improved Wear Rate
- 7) Non Abrasive

- Special Molded Pieces are available. They will be manufactured to exact customer requirements.

WOVEN BRAKE LINING

American Friction Woven Oilfield Brake Lining is produced using the highest quality heavy duty blended yarns available. These yarns are made using high tensile strength long selected organic and inorganic fibers twisted with brass wire for added strength and improved thermal conductivity. The woven tape is impregnated with high temperature resistant resins and friction modifiers which bonds the material (prevents unraveling), stabilizes the coefficient of friction, and improves wear life. The lining is then tightly compressed into a dense accurate form by calendering, then fully cured and sanded on both sides to the proper tolerance. The result is a very dense, durable and consistently performing brake lining. Our woven brake lining can be used effectively in hundreds of applications including cranes, hoists, industrial clutch facings and some oil service applications.

ADVANTAGES

- 1) Extreme Heat Resistance
- 2) Coefficient of Friction Remains High at Extreme Temperatures
- 3) Excellent Cool Down (Heat Dissipation)
- 4) High Tensile Strength
- 5) Low Wear Rate
- 6) Non Abrasive

49/64 x 3/8 (for 3/4" thk blk)	.86
49/64 x 1/2 (for 1" and up)	.86

American Friction manufactures clutch facings and brake lining for Twin Disc, Wichita, National "DyaFlex", Eaton "Airflex" "VC" and many other clutches and applications.

INTRODUCING...

American Friction's New High Density Brake Block

The initial 12-1/2" x 1-1/4" tape is constructed of over 1000 strands of blended yarn. The layers are held together by cross stitches creating an interlocking weave which is packed by a 1200 lb. lay beam. This process creates a strong and extremely dense yet flexible tape.

PO-318 AIR OPERATED CLUTCH

American Friction stocks the most popular “PO” type Twin Disc Clutches and parts. Examples are: PO 218, PO 318, PO 224, PO 324, PO 330, PO 336, PO 342.

Opposing page is an example breakdown of a PO 318.

American Friction stocks brake rims and bolts for popular drawworks. We can usually ship rims quickly even when not in stock. All our rims are “weld overlay” and 50 - 52 Rockwell hardness on the “C” Scale.

American Friction stocks new brake bands for the most popular drawworks. We offer complete refabrication of your old worn bands and will provide you with full certification. We can ship bands with brake blocks installed or separately as needed.
